

Waiter Call System

Avoid food delays, provide Service on demand.

Ideal for all food service outlets, the Waiter Call System has been developed to provide seamless communications between kitchen and waiter staff.

The Waiter Call Pager eliminates overhead paging systems, kitchen bells and the use of numbered light boards in dining and a la carte Clubs, Hotels and Restaurants.

Your staff will spend up to 75% more time on the floor up-selling and attending to your diners' requirements. Waiters will return to the kitchen on demand basis only, after being alerted via the silent vibrating Waiter Call Pager.

Benefits:

- Increases the amount of Waiter to Customer interaction, with the waiters only having to go back to the kitchen when the meal is ready
- Reduces the need for food runners

Features

- Simple and easy to use - one touch operation
- Each pager is Vibration only, therefore its discreet and doesn't affect the Restaurants environment
- Fully Rechargeable system
- 8, 16 or 32 Button Panel Configuration
- Safety cord to avoid dropped pagers
- Up to 2km Range - Power Adjustable

Our pagers can be stand-alone, networked or system integrated into the company's phone or POS system. Modular in design, you can trial a small number of pagers and add more as required.
