

Time & Attendance

Our Biometric clock-in solution helps you stay
stay ahead of time.

Our advanced TIMEMachine ensures that each person is actually at work when they claim to be. You only pay your employees for the exact time they work. You will also reduce costly errors from rounding up and manual processing.

Finger recognition technology is combined with comprehensive time and attendance software. The system can be tailored to suit your working rules, busy roster systems, flexi-time and other working patterns.

Set up is easy, employee enrolment and verification take a few minutes. Standalone system set up requires just power and a PC connection. TIME Machine can manage just a few or several hundred employees.

TIME Machine is one of the most flexible, easy to install and cost effective electronic time clocks available for venues. Fully featured back office software allows editing, verifying, and reporting on all clock-ins and clock-outs and work times.

How Does It Work?

Biometric authentication technology lets you track your employee's time and attendance with the touch of a finger. This is the most accurate way to collect employee time and attendance information. The system verifies an employee's identity based on the characteristics of their fingerprint. Reading sensor scans any fingerprint in under one second making clock in and out instantaneous. A large easy to read LCD screen displays the current time and in & out data for each employee. All employee information is encrypted and recorded on a secure memory card.

Productivity. Flexibility. Connectivity. Trust.

Easy integration with your POS system lets you POS terminals become the clock in/out readers.

TIMEMachine also interfaces with a number of standard payroll packages.

Our system combines robust hardware, industry standard communications infrastructure, and a free limitless employee count application software.

Our time clocks connect seamlessly into your existing IT network. You can track your workforce over multiple sites. Even if your Network is down, TIME Machine keeps recording your staff's activities.

Managing staff time - calculate individual employees' and representatives' attendance times. Overtime, night, weekend, public holiday, breaks, absences, totals and balances.

Organizing Rosters - planning solutions to organize employees' working time to suit individual and general constraints.

Decentralizing administrative tasks - employees and managers to enter and manage their attendance time.

Administrative reporting - fully featured reporting including anomalies and variances.

Benefits of using the TIME Machine

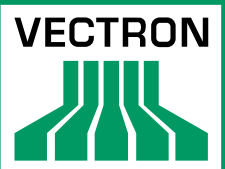

Eliminates human error - estimated to 5-8% of payroll costs

Eliminates rounding up - average 10 minutes per day

Eliminates manual processing - approximate costing \$5,000 pa
