BOOST YOUR MEMBERSHIP NUMBERS WITH JOINUP

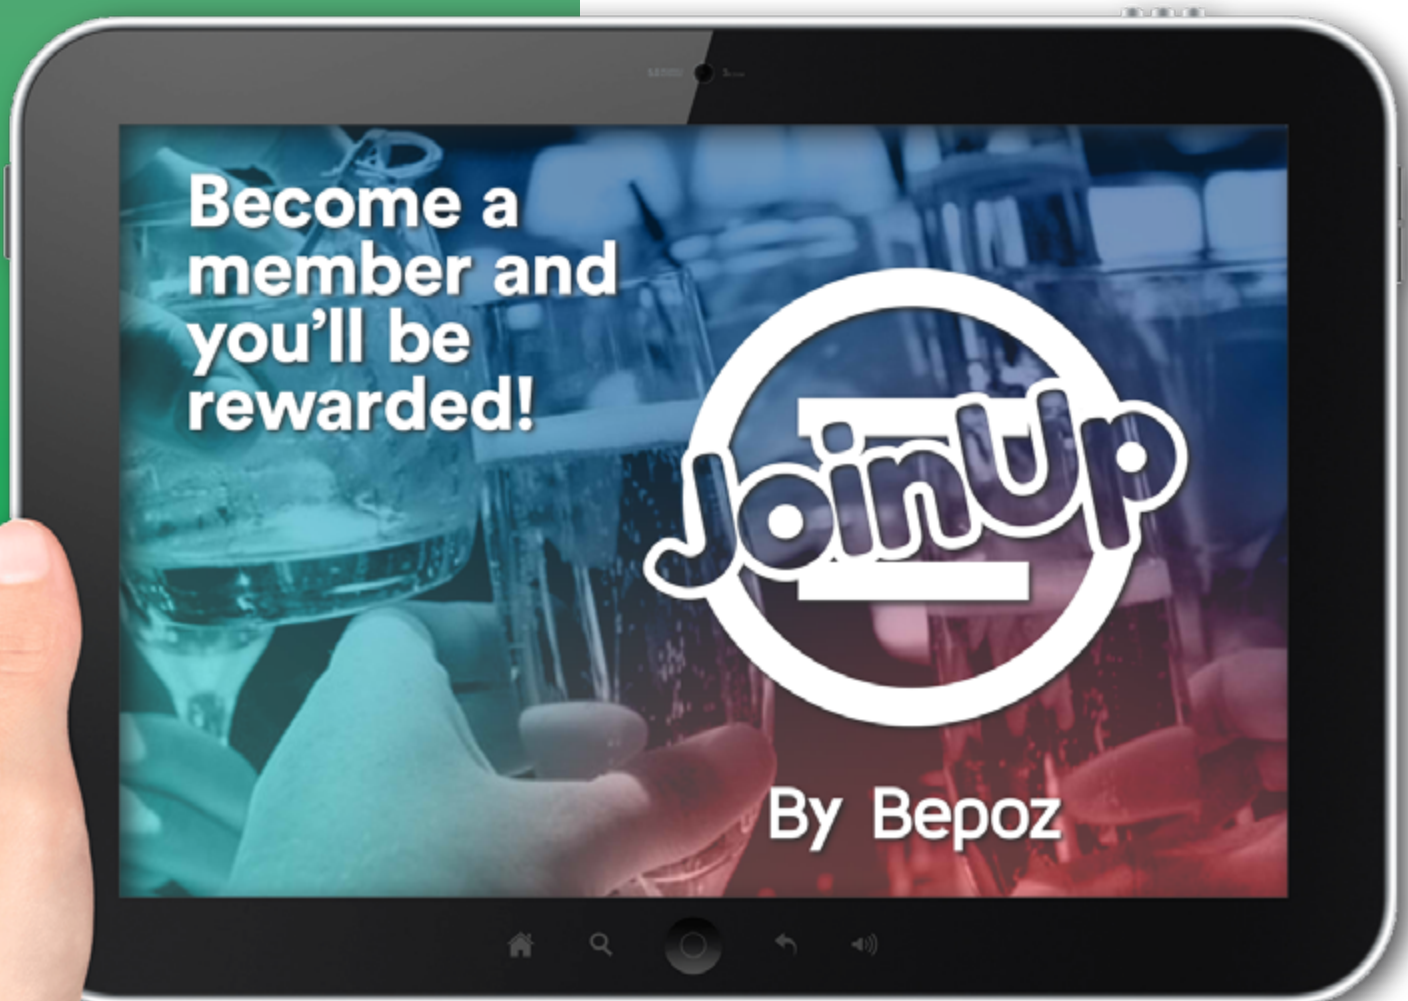

A handy sign up app that allows venues to capture new member details for their membership programs instantly.

Integrated with Bepoz, member records instantly sync with the POS system allowing venues to manage them through their normal membership routines. With data validation, JoinUp also reduces the potential for membership record duplication and data errors.

The JoinUp app can be tailored to a venue's branding and style. The app comes with a content management system allowing for customised form fields, screen savers, welcome email templates, and branding.
